

FineMicro pre-wall

The FineMicro pre-wall element combines integrated insulation and highly effective soundproofing in a compact component. The extremely fine perforations enable outstanding sound absorption despite the slimline structure – ideal for rooms where great design and impressive sound are of equal importance.

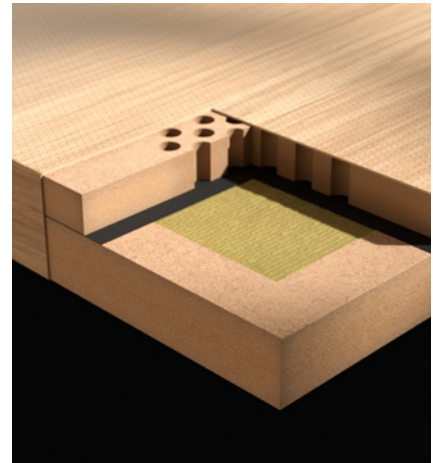

Front	Veneer / laminate / RAL/NCS
Substrate	MDF B2 / B1
Back	Back balancing layer
Fire rating	As required
Structure	10 mm carrier board. Milled 10 / 16 / 19 mm frame on the back. Insulation integrated. Total thickness: 20 / 26 / 29 mm
Perforation	Substrate board perforated in line with acoustic requirements
Micro-perforated	300 µm
Edge finishing	1 mm edges all round, adapted to the finish
Installation	Invisible as required

Optimum board formats based on substrate and finish.

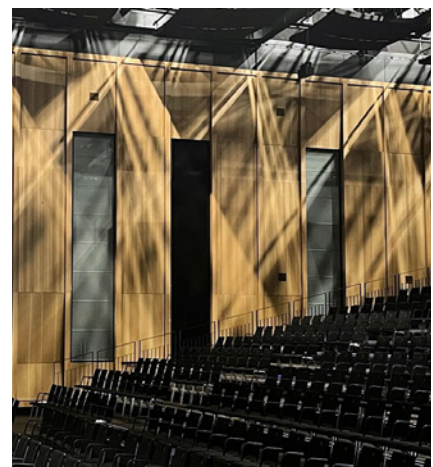

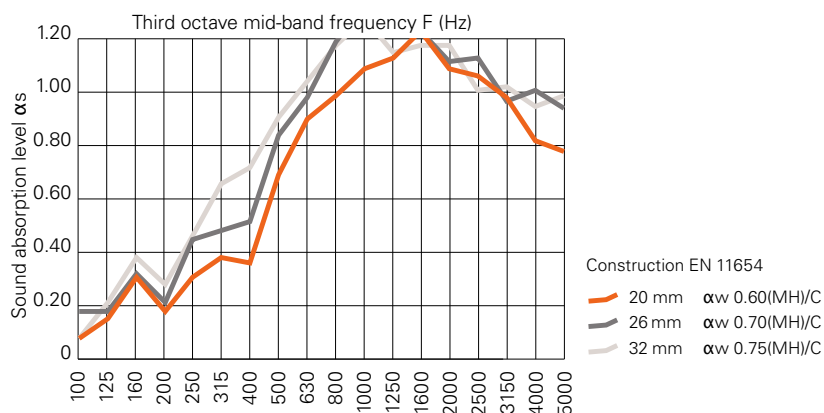

Further formats available on request.

Board width	600 / 1200
Board length	3150 / 2750 / 2400

Max. formats	Length	Width	Thickness
	4000	1200	20 / 26 / 29

Sound absorption
